COMMUNICATION

The European Patent Office herewith transmits the partial European search report under Rule 46(1) EPC relating to the above-mentioned European patent application.

Copies of the documents cited in the search report are enclosed.

The applicant's attention is drawn to the following:

The Search Division informs the applicant that if the European search report is also to cover inventions other than the invention first mentioned in the claims, a further search fee must be paid for each of these inventions, within ONE MONTH after notification of this communication.

Note to users of the automatic debiting procedure:

Unless the EPO receives prior instructions to the contrary, the search fee(s) will be debited on the last day of the period for payment. For further details see the Arrangements for the automatic debiting procedure, Supplement to OJ EPO 06/1994.

	The abstract was modified by the Search Division and the definitive text is attached to the present communication.
	The Search Division considers that the present European patent application does not comply with the provisions of the European Patent Convention to such an extent that it is not possible to carry out a meaningful search into the state of the art on the basis of some of the claims.
	Claims searched completely:
	Claims searched incompletely:
	Claims not searched:
	Reason for the limitation of the search:
\boxtimes	Additional copy (copies) of the documents cited in the European search report.

LACK OF UNITY OF INVENTION SHEET B

Application Number EP 99 30 3347

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-9,19,23,24,28,35,38,39,41-44

Image display apparatus controlled in accordance with a detected current flowing therein, possibly in a panel spacer

2. Claims: 10-13

Image display apparatus controlled in accordance with a detected current flowing outside the image display area, possibly in a sensing electron emitting device.

3. Claims: 14-17,30-32

Image display apparatus controlled in accordance with a detected potential of the display panel.

4. Claim: 18

Image display panel apparatus with electron source, controlled in dependence on its state, detected while no electron is emitted by the source.

5. Claims: 20,21

Image display panel apparatus controlled in accordance with a detected discharge within the panel.

6. Claim : 22

Image display panel apparatus controlled in accordance with a detected power consumption in the display panel.

7. Claims: 25-27

Image display apparatus controlled in accordance with a detected display state, with memory for storing details about detected abnormalities information.

8. Claim: 29

Image display apparatus with prompting of a user to control such apparatus in accordance with a detected display state.

LACK OF UNITY OF INVENTION SHEET B

Application Number

EP 99 30 3347

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

9. Claims: 33,34

Image display apparatus whose degree of vacuum is controlled in accordance with a detected display state.

10. Claims: 36,37

Image display apparatus where a display control operation is selected from a plurality of control operations in accordance with a detected display state.

11. Claim: 40

Image display apparatus with a panel having high degree of vacuum.

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
